

EEG-Based Stress Detection App

Upload an EEG EDF file to predict stress level using trained EEGNet models.

Upload EEG EDF File

S084R04_1.edf
2.4MB

Detected EEG channels after cleaning: 64

All trained 64 channels are available. Processing normally.

Compatible EEG file detected. Using 64ch model.

Total epochs created: 123

Stress Assessment

Stress Percentage

54.09%

Final Result

Stress Level: Moderate Stress

Model Used: 64ch EEGNet

Moderate Stress

- Take a 5–10 minute breathing break.
- Reduce caffeine intake.
- Take short walking breaks.
- Avoid continuous screen exposure.
